

## NIGHT VISION OPERATOR

Our 3-Day Night Vision Operator course is designed to provide law enforcement officers and agents with the foundational knowledge and skills needed to use night vision devices safely and effectively. It is deliberately crafted to address two key realities specific to domestic enforcement operations: 1) varied and unpredictable light conditions; and 2) the presence of innocent bystanders. We will focus on selecting appropriate tools, techniques, and tactics in order to 'win the light fight' and on assessing and precisely engaging threats at 'combat speed'. The course includes classroom presentation, live fire drills, and non-lethal training ammunition (NLTA) drills and exercises. NLTA conversion kits and ammunition are included in the price.

Cost: \$750 | Length: 3 Days

### COURSE TOPICS

Physiology and psychology of night operations | Use of lighting conditions for tactical advantage | NVG basic operation and maintenance | NVG capabilities and limitations | Individual movement and hand-eye coordination under NVGs | Rifle familiarization and qualification (including zeroing IR lasers, shooting from cover, and moving and shooting) | Transition to pistol | Driving considerations | Introduction to 'Combat Clearing' | Countering suspects' use of white light | Mission planning considerations

### PREREQUISITES

This course is restricted to US military, law enforcement, and select security professionals who have documented intermediate to advanced level training with both the carbine and the handgun. Our Low Light Tactics course is recommended, but not required (at this time).

### EQUIPMENT REQUIREMENTS

Night vision goggle with head or helmet mount | Duty/ tactical gear (with ability to carry at least 3 spare rifle mags and 2 spare pistol mags) | PPE (eye and double ear protection; hat or helmet; body armor is optional but recommended) | Pistol with tritium sights | Rifle/ carbine with optical sight and IR laser, sling, and at least 4 magazines | Notepad & pen | Approximately 300 rounds pistol and 300 rounds rifle (UTM non-lethal training ammunition and conversion kit for AR-15/ M4 style rifles will be provided)

### INSTRUCTORS

All of our instructors are recognized subject matter experts in the discipline that they teach. Each also has a proven track record as an instructor, with years of teaching experience in military, law enforcement, and civilian settings. Most have significant real world experience in military special operations, high risk security, and/ or law enforcement. Telluric has been the leading provider of low/ no light training since 2004. We are the US training partner of Aimpoint®.
